

Information Technology

Strike Group has teamed with [Synch-Solutions](#) a leading management consulting and technology services firm, distinguished by our commitment to delivering enterprise transformation solutions. While we provide a wide variety of services for our clients, our core offerings have been strategically selected to cover areas required to create significant and lasting enterprise change.

Managed Services

Managed Services offered by Synch-Solutions bring efficiencies to any size organization by providing any level of IT support the client sees fit. Our service levels run the gamut from basic, remote IT monitoring to complex, fully managed services. By engaging Synch-Solutions as a partner to manage commodity services, the client organization can better focus on its core mission, and can leverage the cost reductions and improved service levels achieved through the economies of scale that we bring to bear.

ERP Solution Enterprise Resource Planning

Enterprise Resource Planning solutions automate, standardize and integrate processes, enabling cost-saving efficiencies and informed decisions. The Synch-Solutions Polaris Methodology, which is aligned with the Project Management Institute's Project Management Body of Knowledge (PMBOK®) Guide, includes predefined tools and templates that deliver cost-saving efficiencies, shorten implementation/upgrade time, and ensure success.

Business Intelligence (BI) and Data Warehousing (DW)

Business Intelligence and Data Warehousing solutions enable a holistic view of information by consolidating data from various independent systems into a highly scalable and flexible Data Warehousing architecture. Our experts configure off-the-shelf Business Intelligence systems to present consolidated data in multi-dimensional, real-time and actionable scorecards and dashboards.

SharePoint Solutions

The Extended Team Approach (ETA) is a flexible approach to application development, from a single placement all the way out to a fully capable Offshore team.

Scalable Teams Ready

Let our SharePoint consultants show you how to take your business to the next level with this groundbreaking portal software.

Custom Application Development

Our Application Development services will maximize the return on your sourcing investment by offering you the right solution.
